How to access WiFi on your mobile device

Following are instructions on how to access WiFi on your mobile device whether it is an iPhone/iPad or Android device.

You will use your UniID as your username. Your password is your HORUS password. These are used when logging into your computer in the morning.

If you have any issues during the setup, please contact the F&S IT Helpdesk on 612 50444 or fs.helpdesk@anu.edu.au

iPhone/iPad

1. Tap on Settings

2. This will open the Settings application. Click Wi-Fi

3. This will open the Wi-Fi application window. If your Wi-Fi button is grey click on it to select it

4. When you Wi-Fi is on, your device will automatically search for available WiFi networks. Click to select ANU-Secure
5. A window will open to add your Username and Password for “ANU-Secure”

6. Enter your UniID into the Username and your HORUS password under Password. Once details are entered, click Join.

7. You will get a Certificate window. Click on Accept button to accept the certificate.

8. You will then be taken back to the Wi-Fi window. You will be connected to ANU-Secure, this is evident by the ‘tick’ next to ANU-Secure and there will be a Wi-Fi symbol 📡 at the top of your screen.
Android

1. Click on Settings icon

2. Under Setting click to select WiFi

3. If your WiFi is disabled click on the OFF button to turn it ON.

4. When the WiFi is enabled it will automatically search for available WiFi networks. Click to select ANU-Secure.

5. You will get an ANU-Secure window, click Connect
6. Enter your UnilD under **Identity** and your **HORUS password** under **Password**. Once details are entered, click **Connect**.

7. It will automatically authenticate and connect to ANU-Secure.
